

Patent number:	JP9180366
Publication date:	1997-07-11
Inventor:	TSUJIMURA TAKASHI; NISHIGAKI TETSUO
Applicant:	SONY CORP
Classification:	
- international:	G11B20/02; H04N5/7826
- european:	
Application number:	JP19950339675 19951226
Priority number(s):	

PROBLEM TO BE SOLVED: To record a voice-multiplexed broadcasting as two channels in modes correspond to a selection operation, receiving the voice-multiplexed broadcasting (so-called, voice multiplexed broadcasting of US system or the like) in which a main voice is stereo signals and a subvoice is a monaural signal.

SOLUTION: When the receiving of a subvoice (SAP) is detected by a tuner 1, a mode controller 5 executes a mode recording only a main voice (MAIN L, MAIN R) in a stereo on a tape 10 or a mode recording the main voice (MAIN L+R) and the subvoice (SAP) on the tape 10 while respectively making them 1 channel according to the selection by a menu input 4.
